WOVEN IMAGE®

ACOUSTIC TILES

DESIGN FREEDOM WITH ACOUSTIC PERFORMANCE

Decorative acoustic tiles are the perfect product range for designers looking to achieve acoustic function with a quality design.

The portfolio boasts an extensive solid colour palette as well as printed, precision cut and 3D formed tiles, providing an endless stream of design configurations.

COMMERCIAL INTERIOR APPLICATIONS

Whether you're looking for floor to ceiling coverage or to create smaller design features, acoustic tiles are a stylish way to control noise in interior spaces including:

- Open-plan offices, meeting rooms and collaborative workspace
- Cafés and restaurants
- Lobby's and public spaces
- Classrooms and music rooms

EASY INSTALLATION

Our acoustic tiles are lightweight and easy to install. Designs pattern match without the need for trimming. Tiles are either mounted using adhesive or, with our 3D tile range, installed using a sophisticated clip system.

ENVIRONMENTALLY CONSCIOUS

Most tiles in the collection are made from EchoPanel®, which achieves Global GreenTag™ certification (Green Rate: Level A)¹.

EchoPanel® is made using 60% post-consumer PET from single-use bottles that would otherwise end up in landfill or our oceans.

Impressively, in 2018/19, Woven Image diverted in excess of 624 tonnes of PET plastic from landfill. This equates to over 31 million waste bottles.

To date, over 230 million 600ml PET bottles have been repurposed to produce EchoPanel® products.

For more information, full product specifications or to request a sample, please contact your local Woven Image representative, call +61 1800 888 650 or visit www.wovenimage.com
